

COCKTAIL PAPER

Introduction: Our History

Cocktail has a planned launch date of July 29th, 2021 at 4 pm PST on Pancake Swap (Dx Sale Whitelist Sale at 3 pm PST).

The token utilizes a unique combination of tokenomics into one project to offer a “cocktail” of all the best features the Binance Smart Chain (BSC) has to offer.

Cocktail has the following features (a mix of rewards):

- Automatic hourly rewards payments in SAFEMOON, wBTC, wETH, wADA, XLM, MATIC, LINK, BNB, BUSD, and CAKE
- Automatic + Manual whale buy back mechanism
- Rewards multiplier function technology

The project is the first ever to launch a rewards multiplier function on the BSC network. The Cocktail developer team created the “Binance Auto-Reward Bot”. The rewards multiplier bot system can take the average investor and transform them into a whale investor based on their individual merit and promotion of their investment. This new technology not only benefits individual investors, but also increases Cocktail brand awareness that will fuel future project growth.

COCKTAIL of REWARDS

The graphic features ten stylized cocktails arranged in two rows of five. Each cocktail is represented by a white outline of a glass filled with a specific cryptocurrency logo. The top row includes SAFEMOON (teal), BUSD (orange), wADA (blue), wETH (pink), and wBTC (orange). The bottom row includes XLM (orange), LINK (blue), BNB (orange), CAKE (orange), and MATIC (purple). Each cocktail is garnished with a slice of citrus, a green leaf, or a chocolate bar. The background is dark blue.

SAFEMOON BUSD wADA wETH wBTC

XLM LINK BNB CAKE MATIC

Automatic Rewards Distribution

Cocktail is the next evolution of a curated selection of token rewards including:

- SAFEMOON
- wBTC
- wETH
- wADA
- XLM
- MATIC
- LINK
- BNB
- BUSD
- CAKE

The Cocktail contract deploys a yield generating/reflection contract on the BSC: where holders can swap BNB rewards to rewards to the various tokens listed above.

The token contract utilizes a static rewards system—15% of every transaction is split in three:

- 9% is added to the pool that is redistributed to holders
- 3% is used for the Buy Back feature for the token
- 3% is used to fuel the liquidity pool

In order to fully understand rewards redistribution, we will summarize redistribution models currently operating on the BSC network.

Classic Redistribution

This is a concept that was popularized by Safemoon.

The mechanism incentivizes token holders to hold in order to earn dividends from the transactions (buys and sells). Redistribution is based on percentage (in the contract), current token balance and number of holders.

Holders receive more tokens automatically.

BNB Redistribution

Popularized by HODL and GhostFace, a transaction fee is applied to every single buy /sell order, tokens are then swapped in realtime for BNB and added to a POOL (similar to how liquidity pools work). Holders can then go to a website and manually claim the BNB earned at specific time (daily / weekly / etc..).

The BNB they can collect are based on their token holdings % and the current pool size.

Holders claim on a website and request their BNBs

Cocktail Redistribution: a Blend of Rewards

Cocktail is the only BSC project to offer a selections of tokens on the BSC network including SAFEMOON, wBTC, wETH, wADA, XLM, MATIC, LINK, BNB, BUSD, and CAKE.

BNB will be the default rewards token. However, BNB can be swapped out for any token outlined above and holders will be able to choose which currency they would prefer for their reward payment.

We created a unique auto-claim feature for every single holder.

The way it works for holders:

Holders buy tokens and hold them, and if they are eligible for the rewards program, every 60 minutes they will automatically receive BNB (or any token they prefer) in their wallet.

Not a single action is required.

**Cocktail tokens amount is persistent and won't change.*

Contract Mechanics:

- The contract keeps track of all token holders
- The contract keeps an index into the array for processing
- Every transaction processes a certain number of users, depending on the transaction size (bigger token transfers can process more, since the gas will still be proportionally less than the value of the tokens)
- The token is based on a Dividend-Paying Token Standard, which means all BNB/BUSD contract gains will be split equally proportionally to the dividend token holders.
- When a user is processed, the contract checks how many withdrawable dividends they have, and sends it to their wallet in whatever token they prefer (once they set it on the dashboard).
- Holders have the option to swap their BNB to any other rewards token offering (SAFEMOON, wBTC, wETH, wADA, XLM, MATIC, LINK, BNB, BUSD, and CAKE)

This system is fully automated and doesn't add minimal gas fees proportional to value transferred. The number of holders processed through each transaction is dynamic and based on transaction size. Holders will receive dividends from the queue based on their position in the array. It's a fair system, fully automated.

Automatic + Manual Whale Buy-Back Mechanism

The token contract also deploys a manual AND automatic buy- back mechanism.

At specific times, the whale buy-back system will be activated to buy back and burn tokens at opportune times in the market, raising the overall floor price. In addition, during these times, fees for buying can be lowered and fees for selling can be raised in an effort to attain and keep new investors.

Rewards Multiplier Technology

Holders of Cocktail will automatically receive rewards of their choice from a selection of tokens (SAFEMOON, wBTC, wETH, wADA, XLM, MATIC, LINK, BNB, BUSD, CAKE) to their wallets for holding the token. They will also have the opportunity to multiply their rewards. The developer team has created the first ever rewards multiplier technology in the cryptocurrency space called the "Binance Auto-Reward Bot".

When a holder of Cocktail promotes the token and submits proof to the verified Cocktail Discord, the rewards bot automatically will reward holders with extra BNB/BUSD rewards. This revolutionary new bot technology that serves as a rewards multiplier has never been launched on the BSC before. This new technology will enable the average investor to multiply their initial investment simply sharing the Cocktail brand.

The team's "Binance Auto-Reward Bot" can take the average investor and transform them into a whale investor based on their individual merit and promotion of their investment. It really is a winning strategy and formula that not only rewards individual investors, but also increases Cocktail brand awareness. Increased brand awareness will fuel project growth and attract new investors.

Our "Binance Auto-Reward Bot" is a revolutionary breakthrough in the cryptocurrency space that will not only multiply rewards for the individual investor, but also translate to growth of the overall project ensuring long term and sustainable success. Therefore, ultimately rewarding every single investor apart of the Cocktail project.

Cocktail Launch

- **PRIVATE PRESALE**
- **WHITELIST PRESALE**

Whitelist Presale will be launched on DxSale.

The presale link will be shared only to the Telegram group before launch.

The presale includes:

- Private presale phase: for private investors
- Whitelist presale phase: Whitelist investors included members of our community that spread awareness of the Cocktail launch
- **DEX public listing (Pancake Swap)**

Following the presale, Cocktail will launch on Pancake Swap.

Contract ID: Not released yet

Tokenomics

Network: Binance Smart Chain (BEP-20)

Ticker: COCKTAIL

Contract address: Not Released Yet

Decimals: 18

- **TOTAL SUPPLY :** 1,000,000,000
- **PRESALE RATE :** 1 BNB = 530 000
- **TOKENS FOR PRESALE (DX SALE) :** 42.5%
- **PRIVATE SALE:** 18%
- **AIR DROP:** 2%
- **PANCAKE SWAP LISTING RATE:** Same as presale rate
- **MARKETING WALLET:** 5%
- **PANCAKE SWAP LIQUIDITY:** 32.5%
- **HARD CAP :** 800BNB
- **MIN/MAX CONTRIBUTION :** 0.1BNB - 1BNB
- **PRESALE DATE/TIME :** July 29th, 2021 (3 pm PST/10 pm UTC)
- **Liquidity Locked:** 100%

Security of Cocktail

Locked Liquidity

Initial liquidity will be locked for 6 months to provide holders with peace of mind that the token can always be exchanged. A trusted 3rd party, DX Sale, will facilitate transition of raised liquidity to locked liquidity in a secure locker for the full timeframe.

You can buy our token through the swap link on our website, or Pancake Swap.
